Attachments: WCWD - Water Efficient Urinals Project - Replacement Plan.docx

Good morning Tom,

Thank you for your all of your help. I found the e-mail that you were referring to during our conversation today.

Main Office Urinals (per Thursday, 9/18 e-mail)

Armando, our proposal for the main office urinal change out is \$3468.00

We will remove the (2) urinals, open the wall as necessary to redo the plumbing for (1) handicapped urinal. Urinal to be .125 gallon per flush type with auto valve

Not included is the following:

- (1) Sheetrock repair after urinals are removed and plumbing redone.
- (2) Tile replacement
- (3) We will coordinate with your tile person to reinstall the new urinal with auto flush valve.

Total Cost = \$3,468.00

Main Office – Employee Restroom (per Monday, 7/28 e-mail)

Replace the larger urinals with 0.125 urinals and new valves, cost would be \$1045.00 each

\$1045.00 each x 1 urinal = \$1,045.00

Total Cost = \$1,045.00

CSO (per Monday, 7/28 e-mail)

Replace the larger urinals with 0.125 urinals and new valves, cost would be \$1045.00 each

\$1045.00 each x 2 urinals = \$2,090.00

Total Cost = \$2,090.00

WPCP (per Monday, 7/28 e-mail)

Replace the small urinals with 0.125 urinals and new valves, cost would be \$811.26 each

\$811.26 each x 2 urinals = \$1,622.52

Replace the larger urinals with 0.125 urinals and new valves, cost would be \$1045.00 each

\$1045.00 each x 1 urinal = \$1,045.00

Total Cost = \$1,622.52 + \$1,045.00

Total Cost = \$2,667.52

Overall Total Cost

Main Office-Lobby + Main Office-Employee Restroom + CSO + WPCP
\$3,468.00 + \$1,045.00 + \$2,090.00 + \$2,667.52 = \$9,270.52

By combining the e-mails, I have calculated the total proposed cost to be \$9,270.52.

Thank You,
Armondo Hodge
